

Getting 'In The Loop'

How to download and log into Loop?

1. Download Loop from your chosen App Store
 - To find, search for **'Allocate Loop'** on your app store.
2. Create your Loop Account
 - Use your personal contact details to create your Loop Account.
 - This is what you will use for logging in the future and in case you forget your Loop password.
 - If you have the Me App, use your Me App login details here instead of creating a Loop account.
3. Once logged in, connect to your organisation using your Organisational Credentials.
 - This then connects your Loop account to your organisation and colleagues.
 - You only have to connect to your organisation once.

Don't know your organisational credentials?
Don't worry, they are supplied by us and will be passed to you when its time to 'get in the loop'
