

The Cherry Picker will be positioned within the nearside lane inside of the existing TM zone.
 The TM zone will need to be adapted to temporarily suspend the existing pedestrian walkway as well as widened to allow enough room for the cherry picker to be positioned safely.
 All TM works by others.
 Atec propose to carryout works outside of hours with a planned start circa 04:00am.
 Atec propose the use of a truck mounted Z20 Cherry Picker. Atec will drive the cherry picker to site when needed and drive it away once the work is completed. TM adjustments are only required for the duration of the works.

Due to the state of the foot path, its not suitable for positioning a Cherry picker. Instead the Cherry picker will need to be sited on the nearside carriageway adjacent to the CCTV columns.
